

Kit of 2 WiFi Powerline Adapters AV600Mbps WiFi N300Mbps Passthrough Socket + Ethernet RJ45 Port Gray and White TP-Link

Descriptif produit

The TP-LINK TL-WPA4225KIT extends your Internet connection to every room in the house via the electrical network.

Features

The TP-Link TL-WPA4225 KIT extends your internet connection to every room in your home using your existing electrical wiring. It features a Wi-Fi cloning button for easy network expansion, meaning it can automatically copy the SSID and password from your WPS-enabled router. This simplifies Wi-Fi setup and allows for seamless Wi-Fi roaming throughout your home.

Instant Wi-Fi Range Extension

With its Wi-Fi cloning button, the TL-WPA4225 can automatically copy your router's wireless network name (SSID) and password with the touch of a button. After pressing the button, you can place the powerline adapter wherever you need wired or Wi-Fi access and enjoy a seamless network throughout your home or office.

Powerline Speed: Up to 600 Mbps

With advanced HomePlug AV technology, the TL-WPA4225 KIT delivers stable powerline speeds of up to 600 Mbps over a distance of 300 meters. It's an excellent choice for connecting computers, game consoles, set-top boxes, printers, and NAS devices at home or in the office.

Extend WiFi Coverage to Every Room

With a maximum speed of 300 Mbps, you can effortlessly extend your wireless coverage using powerline to stream and share data from your WiFi devices to every room in your home or office.

Driver-Free Installation

This adapter supports Plug-and-Play functionality, allowing users to simply plug it into a power outlet without installing any drivers.

Plug and Play

You can set up a powerline network in minutes with TP-Link Powerline adapters. Simply plug and play. Additionally, the "Pair" buttons on the adapters can be used to encrypt data, secure the powerline network, and manage multiple powerline adapters on your home network.

1. Plug one powerline adapter into a power outlet near your internet connection (router or modem).
2. Connect additional powerline adapters to link desktop or laptop computers, TVs, or other devices via Ethernet cable or Wi-Fi. That's it!

Powerline adapters must be used in pairs or groups of two or more.
