

Whole Home Mesh System WiFi AC1300Mbps - MU-MIMO Dual Band - Velop WHW01 White Linksys

Descriptif produit

The award-winning Velop Wi-Fi Multiroom system with built-in Intelligent Meshâ"¢ technology consists of access points designed to provide a foolproof, high-performance Wi-Fi network

System compatible with most Internet telephony operators
Enjoy a flawless Wi-Fi connection, regardless of the equipment or speed provided by your internet service.

Automatic updates
Velop is self-correcting and optimizes its functionality to provide a fast Wi-Fi connection without any slowdown.

Scalable Wi-Fi system
thanks to automatic updates, you keep your system up to date and secure

Quick and easy configuration
With the Linksys App, all you have to do is place your Wi-Fi hotspots wherever you want; give your network a name; and choose a password.

Access points designed to fit anywhere
Thanks to their elegant design, the access bollards can be integrated into any type of interior.

Protecting your Wi-Fi network
You can easily and at your convenience block access to certain websites or pause Internet access
