

Smart Bulb Camera Bulb E27 3MP 2K Indoor Night vision Colors White IMOU

Descriptif produit

The camera provides essential protection when you are away from home.

Choose what's best for you
Bulb Cam offers two different camera pixel options, so you can choose the one that suits you best.

360° protection with pan and tilt
Horizontal rotation from 0° to 340° and vertical rotation from 0° to 90° mean you can fully protect your home with a 360° view.

Automatic bulb on/off
You can add up to 5 timers, and the light will switch on or off when you need it.
The bulb can also be connected to the camera. When the detection target appears, the light comes on.

Intelligent colour night vision to light up the night
You can switch between the 3 night vision modes (infrared / colour / intelligent), or deactivate them at any time to suit your needs.
Intelligent mode: The Bulb Cam automatically switches from infrared to colour mode when suspicious movement is detected.

Precise detection of people and vehicles
With IMOU SENSE™, the recently enhanced AI-based detection of people and vehicles can effectively reduce false alarms caused by mosquitoes and tree shaking. The effective detection range is up to 22 metres for people and 44 metres for cars, ensuring truly "accurate" detection respectively.

Simple installation thanks to universal E26/E27 screws
No more complicated wiring, Bulb Cam can adapt to all E26/E27 screws, just tighten it and installation is complete.
