

Smart Camera Bullet 3 Motion detection Full HD 5MP Indoor & Outdoor White IMOU

Descriptif produit

The camera provides essential protection when you are away from home.

Clear night vision

Infrared camera provides images up to a night vision distance of 30 metres

2MP/4MP

Records FHD 1080P or QHD 2.5K video in real time, even in dark environments

Customisable detection zone

Focus on what's really important to you without additional disruption

Human detection

Accurately identify the moving human body

All-metal casing

Offers exceptional durability and resistance to potential damage

Weatherproof to IP67

Allows you to install the chamber in all weather conditions

Versatile storage

Supports cloud storage and microSD cards up to 256GB (not included)

Excellent Wi-Fi connection

2.4 GHz Wi-Fi with external antenna for stable video streaming even at long ranges

Guarantee complete protection for your home

Day: the WiFi outdoor surveillance camera is equipped with a high-definition 3.6 mm wide-angle lens with a 108° viewing angle, and can record real-time FHD 1080P or QHD 2.5K video even in dark surroundings.

Night: thanks to night vision, Bullet 2C can capture all the important moments, even at night, so you don't miss a thing.

Backyard: its compact, elegant design means it fits into any corner, and it's easy to install. You can install it wherever you need it, whether at the front door or in the backyard. It will cover every corner of your home.

Sunny: the 2C outdoor bullet security camera has an IP67-certified shell and has been proven capable of withstanding harsh environments subjecting it to intense shock and vibration. It can also withstand a wide temperature range and when subjected to large quantities of particles and water ingress.

Act faster with a smarter camera

Customisable detection zone: you can customise the detection zone to focus on the space you really care about, whether that's your garage, your children, your play area or your swimming pool. What's more, you can filter out areas on the road or belonging to your neighbours.

Human detection: unlike with passive infrared detection, you won't be bothered by slightly misleading situations and it really saves you time.

Intelligent colour night vision

You can switch between the 3 night vision modes (infrared / colour / intelligent), or deactivate them at any time. (Only Bullet 3 has colour night vision, while Bullet 2C and Bullet 3C have black and white night vision).

*Intelligent mode: The camera automatically switches from infrared to colour mode when suspicious movement is detected.

Dual antenna

2.4 GHz Wi-Fi with external antenna for stable video streaming even at long ranges

3 m power cable

No need to worry about the distance or height of the place where you want to place the security camera

Advanced CMOS sensor lens

You can benefit from a considerable reduction in power consumption and a smaller camera, since the data evaluation logic can be integrated into the same chip while still offering a very high frame rate.

Compatible WiFi

Color : White
