Bluetooth® Speaker Flip 7 30W Waterproof Camouflage JBL

Descriptif produit

Bold sound for all your adventures

Bold JBL Pro sound with AI Sound Boost
We've boosted our bass and refined our tweeter. The result? Powerful, clearer bass, even at maximum volume, and higher frequencies thanks to a new tweeter dome design, adding more depth to your speaker's sound. We've also added our exclusive new AI Sound Boost technology, which listens to your music in real time to deliver maximum acoustic performance with less distortion. It's like our own little audio genie in every Flip 7. So now we can give you better all-round sound without the extra pounds. Same size, bigger.

Up to 16 hours of playback
Keep the mood active for up to 14 hours on a single charge. And when we really need to get some extra juice out for a birthday party, or another dance with our sweetheart, we can get an extra 2 hours with Playtime Boost.

Connecting multiple speakers via Auracast™
Wouldn't it be great to share the atmosphere with our tribe? Now we can. Thanks to Auracast™, we can easily pair two Flip 7 speakers in stereo for a wider soundstage, and connect multiple Auracast™-enabled JBL speakers
to cover more ground with the same playlist.

Water, dust and drop resistant
Have you ever dropped your speaker, rolled down a dusty hill and landed in a lake? No ? Well, believe it or not, it happens. So we designed the JBL Flip 7 to stand the test of time, too. As well as our legendary waterproof and dustproof design (market-leading IP68), we've also ensured that if you drop it from a metre onto your concrete floor, it'll still work. But please, don't throw your speaker away just to impress your friends. Throw some parties instead.
*Based on laboratory test conditions for immersion in up to 1.5 metres of fresh water for up to 30 minutes.

PushLock system with interchangeable accessories
Attach it. Loop it around. Hold it in your hand. Now we can carry our sound our way with the new PushLock interchangeable accessory system. All that power at the touch of a button.
Strap and carabiner included in the box.

Lossless audio playback
When music becomes lossless, it gets even better. For true audio lovers, we've made lossless audio possible by plugging your laptop or other audio device into our USB-C port. But, of course, for this to work, you need a compatible lossless audio source*.
*Requires compatible lossless audio content from supported applications/services.

Portable JBL application
It's an application. We've used them all, and they can be very handy. The JBL Portable app gives you access to support, updates and customisable audio controls, so you can get the right sound for your mood every time.

Recycled plastic and fabric, plus FSC-certified paper packaging
The JBL Flip 7 speaker contains 77% recycled plastic and 100% post-consumer recycled fabric for the speaker grille. It's also packaged in FSC-certified paper, printed with soy ink.
