# MagSafe Wireless Charger Solo 15W Qi Gray Xtorm

## Descriptif produit

**This Xtorm wireless charger is the perfect accessory to easily charge your smartphone, at charging speeds of up to 15W!**

The charger features a unique Xtorm design that will fit perfectly on any desk or nightstand.

The ease of wireless charging
Charging cables often look messy and always end up disappearing behind furniture, just when you need them. This wireless charger makes charging your smartphone ultra-easy - simply place your smartphone on it and it automatically begins charging.

Fast wireless charging
This wireless charger is designed to quickly and safely charge your smartphone at a charging speed of up to 15W. It's therefore perfect not only for charging your device at night, but also for fast charging during the day.

No annoying LED lights
Unlike traditional chargers, which often have annoying lights that can't be turned off, this wireless charger is designed without any LEDs, which is particularly convenient if you want to place it on your nightstand. Instead, it features a distinctive light ring around the base, which only lights up briefly to indicate that charging is beginning. After a few seconds, it slowly fades and stays off, avoiding annoying bright light on your nightstand or desk.

Compatible with all smartphones
The wireless charger has been designed for use with all Qi-compatible smartphones - Android and Apple iPhones.

Developed with passion
At Xtorm, we believe that using our products should bring you pleasure and energy. That's why we pay special attention and care to the design and usability of our products.

Give you #MoreEnergy
This wireless charger features an iconic geometric design with a soft-touch matte finish; it's designed to look and feel exceptional. The result: this charger stands out from the crowd and offers real pleasure in everyday use - giving you and your devices more energy.
