MagSafe Wireless Charger DUO 15W Qi + USB C/C Charging Cable Gray Xtorm

Descriptif produit

This Xtorm Duo wireless charger is the perfect accessory to easily charge your smartphone, at charging speeds of up to 15W!

The magnetic connector allows you to easily create a dual charger or use them as two single chargers. The charger features a unique Xtorm design that will fit perfectly on any desk or nightstand.

Ease of Wireless Charging
Charging cables often look messy and always end up disappearing behind furniture, just when you need them. This wireless charger makes charging your smartphone ultra-easy - simply place your smartphone on it and it automatically starts charging.

Magnetic Duo
Thanks to the innovative integrated magnetic click system, you can choose to use the chargers as a dual wireless charger or as two single chargers. For the dual charger, you only need one charging cable! Prefer to use the chargers separately? No problem, two cables are included so you can decide how to use them.

Fast Wireless Charging
This wireless charger is designed to safely and quickly charge your smartphone at a charging speed of up to 15W. It's therefore perfect not only for charging your device at night, but also for fast charging during the day.

No Annoying LED Lights
Unlike traditional chargers, which often have annoying lights that can't be turned off, this wireless charger is designed without any LEDs, making it particularly convenient if you want to place it on your nightstand. Instead, it features a distinctive light ring around the base, which only lights up briefly to indicate that charging is beginning. After a few seconds, it slowly fades and remains off, avoiding a bright, distracting light on your nightstand or desk.

Compatible with all smartphones
The wireless charger is designed for use with all Qi-compatible smartphones - Android and Apple iPhones.

Developed with passion
At Xtorm, we believe that using our products should bring you pleasure and energy. That's why we pay special attention and care to the design and usability of our products.

Giving you #MoreEnergy
This wireless charger features an iconic geometric design with a matte, soft-touch finish; it's designed to look and feel exceptional. The result: this charger stands out from the crowd and offers a true pleasure of use every day—giving you and your devices more energy.
