

Smart LED Bulb CL2B 9W E27 Multicolor and white light Compatible with Alexa, Google and Matter White IMOU

Descriptif produit

Matter Smart Lighting for a Unified Connected Home

Universal Matter standard

This bulb adopts the Matter protocol for perfect compatibility with all smart systems. It sets up instantly and communicates flawlessly with your other connected devices.

16 million color palette

Create the ideal atmosphere thanks to total customization of color and saturation. Whether for a festive evening or dimmed light, the bulb adapts to your desires.

High-precision adjustable whites

Adjust the color temperature from warm white to cool white depending on the time of day. This optimizes your visual comfort and respects your circadian cycle.

Voice and remote control

Control your lighting by simple voice command via your favorite home assistants. The mobile app also allows you to check and turn off your lights wherever you are.

Scheduling and scenarios

Automate your daily life by creating schedules or presence simulations. The bulb can synchronize with your alarms or cameras for a reactive home.

LED energy efficiency

Its 9W technology offers a luminous flux of 806 lumens, equivalent to a classic 60W bulb. You reduce your energy consumption while enjoying powerful and long-lasting lighting.
