

Smoke detector with warning siren + Intelligent Zigbee Gateway White IMOU

Descriptif produit

Connected and interconnected home fire safety system

Instant multi-zone detection via radio link
If one smoke detector activates, all fire alarms in the system sound immediately across your home without relying on Internet. This protective network creates an audible warning everywhere to ensure no emergency goes unnoticed, even if a fire starts away from you.

Remote control and real-time app notifications
Stay connected to your home's safety even when you are away thanks to instant alerts sent straight to your smartphone. The dedicated app allows you to check your system's status or silence an alert with a simple touch for total peace of mind.

High-power 85 dB siren for immediate awakening
Engineered to efficiently pierce through partition walls, closed doors, and ambient noises, the built-in siren delivers a powerful 85-decibel volume. This maximum sound intensity guarantees the immediate awakening of your entire family, even during deep sleep.

Long-life battery for five years of continuous protection
This system operates year after year without failure to bring you long-term peace of mind throughout your daily routine. Its 5-year battery lifespan eliminates the hassle of monthly battery changes and avoids repetitive low-battery chirps.

Strict European EN14604 certification compliance
This hardware surpasses rigorous testing for sensitivity, environmental durability, and false alarm resistance required by the EN14604 standard. It guarantees a reliable and immediate response to any type of fire outbreak, whether slow or fast-burning.

Smart home compatibility with Alexa and Matter protocol
Thanks to the included gateway and Matter protocol, the system seamlessly integrates into your smart home layout and supports voice control via Alexa. You can easily silence a cooking alert using a simple and natural voice command.

Quick tool-free installation and extended warranty
Mounting takes only seconds without a drill on your ceilings or walls using the included high-resistance 3M double-sided adhesive. Screws are also provided for maximum grip, with the entire pack backed by a 3-year warranty.

Technical characteristics

Kit Composition: 3x Smart Smoke Detectors and 1x Wireless Zigbee Gateway
Acoustic Output: High-intensity 85 dB built-in emergency alarm siren
Energy Longevity: Extended battery lifespan delivering up to 5 years of operation
Safety Standards: Official EN14604 European compliance certification
Smart Connectivity: Matter protocol, Zigbee link, and Alexa voice support

Compatible mobiles

Compatibilité
Compatible avec : IPHONE 3G / IPHONE 3GS / IPHONE 4 / IPOD TOUCH / 7 PRO / GALAXY ACE S5830 / GALAXY TAB 10.1 P7100 .

Compatible WiFi + Bluetooth®

Color : White

Ref : IMOUKITDETECFUMWH

EAN : 6937479644821

Pack contents : Smoke detector with warning siren + Intelligent Zigbee Gateway + 3M double-sided adhesive kits + Security mounting screw sets + User Guide/Security/Warranty
